“Excellent course that has improved my knowledge and confidence in using and interpreting ultrasound in clinical practice.”

“Thank you informative and extremely useful, would definitely welcome more programmes like this.”

“Really enjoyed this course and the start to ultrasound journey. Very knowledgeable teaching and well taught especially thought having Adrian (radiologist) here was really useful and helped my understanding a lot.”

“Talk from Dr Hood really helped consolidate understanding of key signs to look for in lung US. Good practical opportunity. Appreciate not easy to get pts with pathology to scan but if it was it would be really good addition to the course. Otherwise, a really useful & enjoyable course.”

“DVT practicing useful as I have not been taught in A&E.”

“Excellent training, well organised, good balance of theory and practical.”

“Excellent session on US training of different areas. Great lung pathology teaching by Dr Hood.”
