

# Focused Acute Medical Ultrasound (FAMUS) Course

## Be at the Forefront of Medicine!

Bedside ultrasound gives physicians an advantage in making critical decisions without the delay of imaging diagnostics or laboratory testing.

Now identified as an essential skill and included in the training curriculum from the core training years.

Join our Society of Acute Medicine accredited FAMUS course to brush up your skills, refresh your knowledge and further integrate ultrasound into your clinical practice.

## Who Should Attend:

This course is for you if you are an acute or emergency physician including junior trainee, higher speciality trainee, advanced care practitioner, trust grade doctor or consultant.

This course will also brush up your skills and refresh your knowledge if you already use ultrasound in your clinical practice.

## The Course Format

Learn through hands-on scanning, image interpretation, case discussions, and evidence review.

- Hands-On Learning: Practice with real-life cases, live models and ultrasound Bodyworks simulator
- Small Group Learning: Low candidate to instructor ratio and plenty of hands on practice

## Curriculum
