16:30-17:00 pm Feedback and certificates

Target audience:

All clinicians interested in Point of Care Ultrasound, Acute and GIM trainees and IMTs and also including ACPs and PAs.

Objectives of the Course

- 1- Understand the physics of the USS machine and which probe should be used for each procedure.
- 2- Establish your skills to deliver a focused bed-side US study in the unwell patients. Focus on Chest, abdominal and vascular Examination. A new module has been added to the course (**USS guided LP**) as it part of the new FAMUS curriculum.
- 3- Get your portfolio signed for the first 5-6 scans, so you can get along with the rest of the logbook easily afterwards.
